

Please be aware of a highly interesting event:

The First International Workshop on "Exotic Flow CytoMetry: Checking Small Things... Better!", aka as ExoFlowMetry 2019, organized by ENEA and GIC, on 13-15 November 2019 in Rome, Italy.

This International Workshop will be focused on Flow Cytometry applications in fields others than bio-medical, herewith named "exotic", as foods, environmental microbiology, plant and animal >analysis and biotechnology where FC is giving an increasing and relevant contribution.

A wide overview of the use of FC in food and environment microbiology, plant and animal biotech, green biotechnology and genomics will be offered, as also related to the complex quality control systems of the agrifood supply chain, in the framework of the European METROFOOD-Research Infrastructure. A demonstrative and practical hands-on day for about 30 persons will conclude the Workshop, during which a selected number of participants will also get a chance to analyze their samples.

Theoretical lectures will be delivered by international experts on 13-14 November 2019 at ENEA Casaccia, Via Anguillarese, Santa Maria di Galeria, Rome, Italy. Wet-lab sessions will be held on 15th November 2019, at the Istituto Superiore Sanità, Viale Regina Elena, Rome, Italy.
